Subject: Bruhn Farms Joint Venture

Two dates i can be sure of when 6 adjusters met Al Bruhn on Oct,29&30th to work his hail shatter loss on several large fields. Prior to that I tried to contact Al on his cell phone with little success, His mailbox was always full so then I would call his agent Terry Nielsen who said I'll get him for you. Well it didnt take more than a few minutes and Al would call me. Our 1st conversation centered on prior claims 2012, one was a replant claim on sbeans and a corn claim, finally conversation about this shatter loss claim. He felt it should have been worked before he had to leave samples. I told him I could not work this claim alone because of all the acres and was waiting for other adjusters work loads to ease up so they could help. One thing Al told me more than once he would not go along with us, instead he sent a hired hand to show us the fields. He always told me he would wait til we were done adjusting and then we would look at the BIG picture for settlement. After completing the claim on the afternoon of Oct. 30th I had intended to go and see Al but his hired man told us he had been really sick that day so I cancelled on that. Some days later I talked to Al about the proof and he wanted me to send it to his agent so they could go over it. In closing the agent Terry Nielsen has been very cooperative and helpful. As far as phone call times and dates I believe I could get my phone records and pinpoint some dates
Galen Sornson

Had to wait for help - cause delay

Faxed to Bank for AL - agent was gone

Met w/ Terry later within week -

Terry said he wanted more - Galen said no more - NOT going to change counts

More Samples in heavy damage + fewer in light areas.

Called AL said no sign -

~~Galen talked to Terry Nielsen~~ * Terry said he ^{would} call Anoka
Doesn't remember how it got removed.

To Claims

Six adjusters met with the insured (Al Brahn) on Oct 22 & 23rd to work his hail shatter loss on several large fields. Prior to these dates I tried to contact Al on his cell phone with little success. His mail box was full. Then I tried his land line, same results (Full). Finally I called his agent Terry Nielsen who said I'll try and get him. It didn't take long before Al called me.

Our last conversation centered on prior claims this year (2012), one was a replant claim on Soybeans & a corn claim. Insured was not satisfied with them. Finally, our conversation turned to his shatter loss claim. He felt it should have been worked before he had to leave samples. I told him I could not work this alone because of all the acres and I was waiting for other adjuster work loads to ease up so they could help.

One thing he told me more than once, he would not go along with us to witness the procedure, instead he sent a hired hand to show us the fields.

The insured always told me he would wait till we were done adjusting and then we would look at the BIG picture of settlement.

After completing the claim on Oct. 23rd I had intended to go and see Al but his hired man (our guide) told us he had been really sick that day so I cancelled on that. 2 or 3 days later I called Al and talked to him about the proof and he wanted me to send it to his agent so they could go over it, which I did.

Days later I met with the agent Terry Nilse, he told me Al would like the 105% percentages raised on certain fields. I told the agent there was no way that was going to happen. End of meeting.

Subject: RE: Al Bruhn

The only claim I was involved with on Al, was this last shatter claim. Galen Sornson was assigned the claim and found that there were 6500 acres to look at. There were six of us that went to help get over all of these acres. I did not talk with Al at all, since I have had dealings with him in the past and thought it would be best. Al's hired man tagged along to show us the fields. As we would finish one he would take us to another. The hired man did not go out and see how we were counting the loss as I don't think he really cared. There were many sample areas to count in all parts of the fields, which was surprising. Most of these fields were big, some 640 acres and one 1100 acres. The loss on these varied a lot from one side to the other. One section had 55% on one side and 2 to 5 % on the other. When he looks at the average loss percentage for the whole field he probably feels we are short. There was previous loss to carry forward from earlier claims. The earlier claims were worked by Kansas adjusters and I don't think Al went to the field on those claims either. Jim Baldwin could fill you in on what went on with the previous claims.

. On 8-23, 8-25, 8-26 called insured to setup apt, Voice mail was full couldn't leave a message. On 8-27, called insured and had a short conversation about loss. He explained to me that I needed to get with agent to get all information regarding claim. That "He trust me to do my job, that's what I get paid to do and that he didn't have time to go out on hail losses" From that point I contacted the agent and met with him on the side of the road where he gave me plot maps and went through information he put together so I could find all the fields whether they were soybean or corn. He indicated 35 lines that we needed to check out. We being Craig Polson and I. So with the all the information we inspected 35 lines in three counties and the only payable loss was one line of soybeans by the home place that had hail damage. There was blown down corn that he didn't have policy coverage on some other fields that were not payable due to election of policy types.

That is about all I can tell you with regards to this claim.

Hope this Helps
